Good afternoon, Tucson. I’m Mayor Regina Romero here with a few updates.

**Today is national Census Day!** Now more than ever, it is important that EVERY Tucsonan is counted. This data determines federal and state funding for our roads, schools, and other community resources. It also shapes our political representation in Congress. Please take 10 minutes out of your day to take the 2020 Census and remind others to do the same. The Census is available online in multiple languages and is protected by federal law. Please visit 2020CENSUS.GOV and make sure you are counted today!

**In a continued** effort to protect public health and flatten the curve, the City Manager, the Director of Parks and Recreation and I collectively decided to temporarily close certain park amenities through April 30th. All existing reservations and permits for special events, sports fields, gazebos, and ramadas in April will be canceled with the option for future credit or refund. For a complete list of park services that are closed, please visit our website at TucsonAZ.GOV.

**The University of Arizona** is launching a series of webinars to address major areas of concern around the coronavirus pandemic. To find more information about the webinars, and other resources mentioned today, please see the video description.

**There are new developments at the State level** to provide additional assistance to restaurants and bars who are facing economic losses as a result of COVID-19. The Arizona Department of Liquor Licenses and Control will defer the payment of all liquor licensing fees by 90 days. For more information on state efforts, please visit AZGovernor.Gov

**For today’s spotlight,** we want to thank everyone who has taken the time to fill out the Census, as well as the workers and volunteers who have been working tirelessly to educate our community on the importance of the Census. We count, fill out the Census!

As always, please remember to STAY HOME (if you can). STOP THE SPREAD. SAVE LIVES.

Somos uno.
I’ll talk to you tomorrow, Tucson.
